CREATING ART LIKE THE MASTERS (430*)
This course reviews eight renowned art masters from art history – including Matisse, Picasso and O’Keeffe. Students will be encouraged to imitate the style of each artist, as taught in class, and to experiment with each artist’s techniques while developing a masterpiece of their own. No art experience is required.
Instructor: Viviana Leija-Syasak is a visual artist who has worked in television production and as an art instructor in a variety of media, from drawing to video animation.

Class requirements: Tablet or computer with internet capability; graphic pencil (4B or 6B); white paper (sketch book or more than 20 sheets of regular copy paper); eraser (any kind); sharpener; 12-inch ruler; markers (primary colors plus black, or box of eight). Digital stylus is optional. Students will need to download a free digital app after registration. Must be age 18 or older.

Cost: $165

Dates and times: Choose Session 1 or 2
Session 1: Jan. 14, 21 and 28, Feb. 4, 11 and 25, March 4 and 11 (eight Thursdays; no class on Feb. 18), 7-8 p.m.
Session 2: March 18 and 25, April 1, 15, 22 and 29, May 6 and 13 (eight Thursdays; no class on April 8), 7-8 p.m.

YOU CAN PLAY GUITAR! (370*)
Learn the basics of playing the guitar, including right- and left-hand technique, strumming chords and playing melodies. Students will learn to play simple blues, rock and folk songs. This is an absolute beginner’s course, with no experience necessary. This course is also recommended for students who have some playing skills but no formal instruction.

Instructor: Rich Hawthorne has been a Bay Area guitar instructor for more than 20 years. He is the co-author of “I’ve Always Wanted to Play Guitar.”

Class requirements: Tablet or computer with internet capability. Must be age 14 or older. Students under 18 must take this class with an adult who has also registered. Each student will need a ukulele. Ukuleles can be purchased from the instructor for $80-$120. To purchase, please contact the instructor at least one week before class starts, at rhguitarist@sbcglobal.net.

Cost: $119

Materials fee: $25 book fee payable to the instructor

Dates and times: Choose Session 1 or 2
Session 1: Jan. 10, 17, 24 and 31, Feb. 7 and 14 (six Sundays), 4:05-5:05 p.m.
Session 2: March 14, 21 and 28, April 11, 18 and 25 (six Sundays; no class on April 4), 4:05-5:05 p.m.

YOU CAN PLAY UKULELE! (390*)
The popularity of the ukulele has grown tremendously over the years. Since it is an easy instrument to learn, it can be quickly rewarding. This class will provide the tools and guidance to start playing with relative ease, even if a student has no musical background. During the course, students will learn how to hold and tune a ukulele, along with basic chords and melodies, fingerings, rhythm and tempo, basic reading and music theory. This six-week course is designed with the beginner in mind.

Instructor: Rich Hawthorne has been a Bay Area guitar instructor for more than 20 years. He is the co-author of “I’ve Always Wanted to Play Guitar.”

Class requirements: Tablet or computer with internet capability. Must be age 14 or older. Students under 18 must take this class with an adult who has also registered. Each student will need a ukulele. Ukuleles can be purchased from the instructor for $80-$120. To purchase, please contact the instructor at least one week before class starts, at rhguitarist@sbcglobal.net.

Cost: $119

Materials fee: $25 book fee payable to the instructor

Dates and times: Choose Session 1 or 2
Session 1: Jan. 10, 17, 24 and 31, Feb. 7 and 14 (six Sundays), 4:05-5:05 p.m.
Session 2: March 14, 21 and 28, April 11, 18 and 25 (six Sundays; no class on April 4), 4:05-5:05 p.m.
**Astronomy and Science**

**APPLIED ENVIRONMENTAL SCIENCE (568*)**
This class provides a comprehensive overview of environmental science. Students will learn an “earth systems” approach to understanding human society and the environment as an integrated system. The course will also explore environmental issues and investigate realistic solutions, while providing greater understanding of environmental factors that affect our world and the environmental impacts of past and current events.

**Instructor:** Veronica Galang has been an educator for more than 20 years, teaching astronomy, biology, chemistry, nanotechnology and physics. She has a master’s degree in physics and enjoys helping students apply critical and analytical thinking to understand the relationships between diverse concepts.

**Class requirements:** Tablet or computer with internet capability.

**Cost:** $89

**Dates and times:** March 4, 11 and 18 (three Thursdays), 5:30-7:30 p.m.

---

**ASTROPHYSICS FOR EVERYONE (375*)**
This nontechnical class is for anyone who is curious about the universe. Students will learn about the roles of matter and energy in the underlying structure of the universe and how clouds of gases and dust give rise to stars, planets and solar systems. They will also explore the sun’s power and its life cycle. Additional topics include the Big Bang theory, gravity, exoplanets, galaxies, black holes, supernovae, dark matter and energy. The class will conclude with current theories about the multiverse and the “Theory of Everything.”

**Instructor:** Awanish Mishra holds a bachelor’s degree in chemistry with a minor in quantum physics, along with a master’s degree in theoretical chemistry.

**Class requirements:** Tablet or computer with internet capability. Must be age 14 or older; students under 18 must take this class with an adult who has also registered.

**Cost:** $69

**Dates and times:** Feb. 25 and March 4 (two Thursdays), 6-8 p.m.

---

**EINSTEIN’S THEORY OF RELATIVITY FOR EVERYONE (486*)**
Einstein’s theories of special and general relativity have stood the test of time for more than 100 years. This class will examine their development and meaning, and the differences between them. Students will review the ways in which popular media address relativity and such topics as time dilation, length contraction and the speed of light. Although these concepts are complex, relativity is an exciting and elegant subject that can be explained in a nontechnical way.

**Instructor:** Awanish Mishra holds a bachelor’s degree in chemistry with a minor in quantum physics, along with a master’s degree in theoretical chemistry.

**Class requirements:** Tablet or computer with internet capability. Must be age 14 or older; students under 18 must take this class with an adult who has also registered.

**Cost:** $69

**Dates and times:** Feb. 25 and March 4 (two Thursdays), 6-8 p.m.

---

**Careers and Technology**

**CAREER AND SUCCESS STRATEGIES (571*)**
This course is designed to help students explore their interests, discover new opportunities and learn how to land their dream job. Students will also learn how to update resumes, network with professionals and develop the skills they need to succeed.

**Instructor:** Wendy Kaaki is a skilled educator and college administrator. She has taught for nearly 20 years and enjoys seeing her students excel as they discover new opportunities.

**Class requirements:** Tablet or computer with internet capability. Must be 16 or older.

**Cost:** $149

**Dates and times:** Feb. 3, 10, 17 and 24 (four Wednesdays), 5-7 p.m.
YOU’RE ON THE AIR: HOW TO MAKE IT IN VOICE-OVERS (451*)
Successful voice-over artist Lisa Foster will introduce students to the voice-over business. This class will cover opportunities, techniques, income potential, demo reels and how to have reels produced. Students will make practice recordings and hear a critique of their work. This is a business with practically no overhead!

Instructor: Lisa Foster has been the voice for website narrations, computer games, commercials and even comedy bits. She is a well-known radio personality in the Seattle broadcast market.

Class requirements: Tablet or laptop with internet capability. Students under 18 must take this class with an adult who has also registered.

Cost: $39
Date and time: June 15 (one Tuesday), 6-8 p.m.

L.E.A.N. START ONLINE NUTRITION (579*)
L.E.A.N provides a road map to better health for adults and seniors by focusing on these four pillars: Lifestyle (how we live), Exercise (how we move), Attitude (how we think) and Nutrition (how we eat). This approach can empower you to mobilize your internal strengths and develop strategies for sustainable lifestyle changes. Tools and resources will be provided through interactive workshops on four successive Wednesdays:

Workshop 1 – Make Health Your Hobby: Understand the health and wellness journey, how to set attainable goals and the importance that nutrition plays in overall health and well-being.

Workshop 2 – Live Without Pain and Inflammation: Learn to recognize key anti-inflammatory foods and ways to incorporate them in daily life. Inflammation is the cause of many health issues including heart disease, diabetes, arthritis, asthma and others.

Workshop 3 – Opening Your Internal Pharmacy: Understand how the body works and learn how the body can make it own medicine.

Workshop 4 – Move Waste From Your Waist: Learn which types of fat are more harmful to health, and how to lose and keep weight off, through lifestyle, exercise, attitude and nutrition.

Instructor: Ankita Kaul has a Master Health Coach Certification from the Dr. Sears Wellness Institute and is co-founder of Happy2bHealthy (H2BH), a program for promoting health and wellness awareness for adults and children. H2BH specializes in providing health education and useful everyday tips through workshops for families and children, as well as for adults in their prime.

Class requirements: Tablet or computer with internet capability. (For younger students, see “L.E.A.N. Start Online Nutrition for Kids” in the De Anza College Academy section of this catalog.)

Cost: $79
Dates and times: Feb. 3, 10, 17 and 24 (four Wednesdays), 6-7 p.m.

NATURAL STRATEGIES FOR SLUGGISH THYROID (452*)
In this class, students will learn natural strategies for addressing common symptoms of sluggish thyroid – including fatigue, slow and consistent weight gain, constipation, cold hands or feet, ridged nails, hair loss, brain fog and metabolism problems. The course will cover self-help strategies, helpful and harmful foods, substances that block thyroid hormones and ways to avoid or overcome stress.

Instructor: Allen Dubner and Sharon Dubner are chiropractors and certified members of Health Talks USA, a national organization of natural health care professionals who deliver educational workshops. Over the last 30 years, they have presented more than 800 seminars to audiences at businesses, churches, schools and health centers in Silicon Valley. They have a wellness health center in San José.

Class requirements: Tablet or computer with internet capability

Cost: $45
Dates and times: May 6 (one Thursday), 7-9 p.m.
**NUTRITION WORKSHOP**
(582*)
How many diets have you tried? Why do diets fail? This workshop will address fad diets, food groups and “normal-size” portions, as well as how to enjoy all foods and lose body fat. Students will get healthy eating ideas for all meals and learn what it takes to go from “yo-yo dieter” to a healthy individual – for life!

**Instructor:** Marisa Schor is a lifelong exercise enthusiast. A former certified Spinning Instructor, she is now certified as a Group Exercise Instructor by the American Fitness and Aerobics Association. She also has CPR and AED certification for adults and children. Since 2002, she has trained in Latin dance including salsa, cha-cha, merengue, samba and bachata.

**Class requirements:** Tablet or computer with internet capability; notebook or binder for class activities. (Instructor will provide handouts before class.)

**Cost:** $79

**Dates and times:** Choose Session 1 or 2
- **Session 1:** Jan. 31 and Feb. 7 (two Sundays), 3-5 p.m.
- **Session 2:** April 6 and 13 (two Tuesdays), 6-8 p.m.

---

**VIRTUAL ZUMBA**
(587*)
Zumba combines hypnotic Latin rhythms with easy-to-follow moves, creating a dynamic fitness program. The goals are simple – to work out and to love working out! Zumba enthusiasts achieve long-term health benefits while experiencing an exhilarating hour of caloric-burning, body-energizing, awe-inspiring movements that are meant to engage and captivate for life! The routines feature intermittent training sessions, with fast and slow rhythms combined with resistance training to tone and sculpt the body.

**Instructor:** Marisa Schor is a lifelong exercise enthusiast. A former certified Spinning Instructor, she is now certified as a Group Exercise Instructor by the American Fitness and Aerobics Association. She also has CPR and AED certification for adults and children. Since 2002, she has trained in Latin dance including salsa, cha-cha, merengue, samba and bachata.

**Class requirements:** Tablet or computer with internet capability; cushiony, supportive sneaker; space to exercise and dance (a wood floor is ideal); large (one-liter) water bottle; small towel (recommended)

**Cost:** $89

**Dates and times:** Choose Session 1 or 2
- **Session 1:** Jan. 12, 19 and 26, Feb. 2, 9 and 16 (six Tuesdays), 5:30-6:30 p.m.
- **Session 2:** Feb. 23, March 2, 9, 16, 23 and 30 (six Tuesdays), 5:30-6:30 p.m.

---

**Sources of Solace**

Explore what makes us feel more connected in challenging times

This evolving virtual exhibition is presented in conjunction with **Silicon Valley Reads 2021**
- **Part 1:** Dec. 15-Jan. 28
- **Part 2:** Jan. 28-March 31

View the exhibition at deanza.edu/euphrat

Check deanza.edu/euphrat for details about the **Silicon Valley Reads Kickoff Event** on Jan. 28

**Winter: Dreaming and Imagining**

**Learning from the Past: Dreaming the Future**
- **Thursday, Feb. 4, 6:30-7:30 p.m.**
- Online event focusing on local history, with Black, indigenous and Latinx cultural curators, defenders and community members

**Spring: A Celebration with Commitment and Action**

**The Power of Our Humanity**
- **Date and Time TBA**
- More details coming soon!

“Dreaming is the stage in which the full panorama of possibilities are expressed (and) considered ...” – Pōka Laenui, indigenous Hawaiian activist
ARDUINO PROGRAMMING – BEGINNING
(Grades 5-8) (462*)
Students will learn the fundamentals of building simple circuits, using the Arduino Student Kit, and learn to control them through programming projects with the Arduino Uno. The course will cover the fundamentals of programming and encourage students to use their imaginations together as they explore beyond the included tutorials.

Instructor: Ben Guansing has taught middle school for 15 years and is a self-taught technologist. He has used Linux since 2004 and became a Raspberry Pi Certified Educator in 2016. He is passionate about maker-based education.

Class requirements: Tablet or computer with internet capability and USB port. Students will need to purchase the Arduino Student Kit for approximately $75, unless they already have it. See the online registration listing for additional required materials.

Cost: $215

Dates and times: Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 5-6:20 p.m.

ARDUINO PROGRAMMING – INTERMEDIATE
(Grades 5-8) (577*)
This course will take students on a further exploration of simple circuits and Arduino Uno. Students will review the fundamentals of Arduino programming before they are introduced to various motors and sensors that expand its capabilities. Students will also learn the basics of robotics programming and building with Arduino.

Instructor: Ben Guansing has taught middle school for 15 years and is a self-taught technologist. He has used Linux since 2004 and became a Raspberry Pi Certified Educator in 2016. He is passionate about maker-based education.

Class requirements: Tablet or computer with internet capability and USB port. Students will need to purchase the Arduino Student Kit for approximately $75, unless they already have it. See the online registration listing for additional required materials.

Cost: $215

Dates and times: March 17, 24 and 31, April 14, 21 and 28, May 5 and 12 (eight Wednesdays; no class on April 7), 5-6:20 p.m.
ARTISTS’ STUDIO
(Grades 3-5) (569*)
Young artists in this class will explore a variety of fine art media including drawing, painting, clay and sculpture. Students will learn to communicate their ideas in both two and three dimensions, while improving their core learning skills and focus. Projects will be presented in a step-by-step manner and build on prior knowledge. Students will also learn about artists and art forms from around the world. This course is offered through the Euphrat Museum of Art.

Instructor: Anna Fankhauser is a museum and classroom art educator who teaches art in the Cupertino Union School District at John Muir, Collins and Blue Hills Elementary Schools. She has worked at museums in Switzerland and the Cantor Arts Center at Stanford, Euphrat Museum of Art, San José Museum of Art and Palo Alto Art Center. Her curriculum has been enriched and inspired by her museum experiences.

Class requirements: Tablet or computer with internet capability. See the online registration listing for additional supplies needed.

Cost: $165
Dates and times: Choose Session 1 or 2
Session 1: Feb. 3, 10, 17 and 24, March 3, 10, 17 and 24 (eight Wednesdays), 4-5 p.m.
Session 2: April 7, 14, 21 and 28, May 5, 12, 19 and 26 (eight Wednesdays), 4-5 p.m.

BBC MICRO:BIT PROGRAMMING – BEGINNING
(Grades 1-4) (460*)
The BBC micro:bit is a pocket-sized computer that introduces students to very basic Python programming fundamentals in a fun way, as they learn how software and hardware work together. The micro:bit has an LED light display, buttons, sensors and many input/output features that students will learn, program and physically interact with. This course will provide an introduction to electronics and programming while encouraging students’ interests in hardware and software. Students will create projects that respond to touch, movement, light, temperature and magnetic fields.

Instructor: Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Class requirements: Tablet or computer with internet capability and USB port. Students will need to purchase the BBC micro:bit kit (available for about $20 from Amazon).

Cost: $215
Dates and times: Choose Session 1 or 2
Session 1: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 12:30-1:50 p.m.
Session 2: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 12:30-1:50 p.m.

BIOLOGY: FROM MOLECULES TO CELLS
(Grades 6-8 and 9-12) (570*)
The study of life science extends from microscopic proteins to entire ecosystems, including an understanding of human body systems. This course emphasizes the relationship between structures and their functions, the basic cell theory that will help students understand the characteristics of life. The course will include hands-on activities as students build models of cells to learn about multicellular organisms, the role of genes and the effects of mutation. Students will also use the models to explore how cells use DNA to construct proteins, build biomass, reproduce and create complex multicellular organisms.

Instructor: Veronica Galang has been an educator for more than 20 years, teaching astronomy, biology, chemistry, nanotechnology and physics. She has a master’s degree in physics and enjoys helping students apply critical and analytical thinking to understand the relationships between diverse concepts.

Class requirements: Tablet or computer with internet capability

Cost: $395
Dates and times:
Grades 6-8: March 16, 18, 23, 25 and 30, April 1, 13, 15, 20, 22, 27 and 29, May 4, 6, 11 and 13 (eight Tuesdays and eight Thursdays; no class on April 6 and 8), 4-5:20 p.m.

Grades 9-12: Jan. 12, 14, 19, 21, 26 and 28, Feb. 2, 4, 9, 11, 23 and 25, March 2, 4, 9 and 11 (eight Tuesdays and eight Thursdays; no class on Feb. 16 and 18), 4-5:20 p.m.

CREATING ART LIKE THE MASTERS FOR KIDS
(Grades 7-12) (430*)
This course reviews eight renowned art masters from art history, including Matisse, Picasso and O’Keeffe. Students will be encouraged to imitate the style of each artist, as taught in class, and to experiment with each artist’s style or technique while developing a masterpiece of their own during each session. No art experience is required.

Instructor: Viviana Leija-Sysak is a visual artist who has worked in television production and as an art instructor in a variety of media, from drawing to video animation.

Class requirements: Tablet or computer with internet capability; watercolor pad with at least 10 pages; watercolor set with at least primary colors plus black; construction paper in a variety of colors; at least one brush; pencil (any type); eraser (any type); scissors and a glue stick.

Cost: $165
Dates and times: Choose Session 1 or 2
Session 1: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 1-2 p.m.
Session 2: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 1-2 p.m.
DATA STRUCTURES AND ALGORITHMS – BEGINNING TO INTERMEDIATE
(Grades 9-12) (572*)
This course provides a comprehensive explanation of data structures including linked lists, stacks and queues, search trees, heap, searching and hashing techniques. Students will learn how to analyze the complexity of an algorithm. The course will use the C++ language for implementing various concepts that students can also code in other languages such as Java, C# or Python.

Instructor: JasneetMattahasamaster’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 11 a.m.-12:20 p.m.

DATA STRUCTURES AND ALGORITHMS – INTERMEDIATE TO ADVANCED
(Grades 9-12) (573*)
This course will expand on the design and analysis of efficient algorithms and data structures, covering design methods, graph algorithms, approximation algorithms and randomized algorithms. Students will learn how the choice of a particular data structure can greatly reduce or increase the complexity of the algorithms. They will also learn how the C++ language can be used for implementing various concepts, which can also be coded in other languages like Java, C# or Python.

Instructor: Jasneet Mattahasamaster’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: March 14, 21 and 28, April 11, 18 and 25, May 2 and 9 (eight Sundays; no class on April 4), 11 a.m.-12:20 p.m.

DRAWING AND ANIMATION – BEGINNING TO INTERMEDIATE
(Grades 3-6 and 7-12) (544*)
This class will introduce students to skills they can use in both drawing and animation. Students will get to draw their own cool characters and learn to animate them as well. The class will explore such concepts as expression and proportion for drawing, along with sequence and speed for animation. No drawing or animating experience is necessary.

Instructor: Viviana Leija-Sysak is a visual artist who has worked for television production companies and as an art instructor in a variety of media, from drawing to video animation. Class requirements: Tablet or computer with internet capability; two digital apps (available free for download after registration). A digital stylus is suggested, but not mandatory.

Class requirements: Tablet or computer with internet capability
Cost: $165
Dates and times:
Grades 3-6: Choose Session 1 or 2
Session 1: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 9:30-10:30 a.m.
Session 2: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 9:30-10:30 a.m.
Grades 7-12: Choose Session 1 or 2
Session 1: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 11 a.m.-noon
Session 2: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 11 a.m.-noon

*Use the class number (after each course title) when registering online.

DRAWING AND PAINTING STUDIO
(Grades 6-10) (463*)
Students will learn and practice classical and contemporary drawing and painting techniques. Students also will strengthen observational and creative thinking, sharpen rendering skills and gain confidence in their artistic abilities. Lessons will include multipoint perspective, depicting shadow and light sources as well as creating engaging content and narratives. This course is offered through the Euphrat Museum of Art.

Instructor: Lydia Sanchez is a visual artist and art instructor working in the Cupertino Union School District at West Valley and Muir Elementary Schools, and the Euphrat Museum of Art. She encourages children and youth to use their imaginations and express their own ideas about the world around them.

Class requirements: Tablet or computer with internet capability. See the online registration listing for additional supplies needed.

Cost: $165
Dates and times: Choose Session 1 or 2
Session 1: Feb. 5, 12, 19 and 26, March 5, 12, 19 and 26 (eight Fridays), 4-5 p.m.
Session 2: April 9, 16, 23 and 30, May 3, 10 and 17, 4-5:20 p.m.

ENVIRONMENTAL SCIENCE: YOU AND THE ENVIRONMENT
(Grades 6-8 and 9-12) (574*)
This course is designed to increase students’ knowledge of today’s environmental challenges, while cultivating their scientific critical thinking skills. Students will explore thematic connections between a variety of science disciplines including biology, chemistry and physics. The course will provide a coherent and realistic picture of the applications of scientific concepts as they manifest in our environment, with a focus on population growth, natural resources and ecosystem dynamics.

Instructor: Veronica Galang has been an educator for more than 20 years, teaching astronomy, biology, chemistry, nanotechnology and physics. She has a master’s degree in physics and enjoys helping students apply critical and analytical thinking to understand the relationships between diverse concepts.

Class requirements: Tablet or computer with internet capability

Cost: $395
Dates and times:
Grades 6-8: Jan. 11, 13, 18, 20, 25 and 27, Feb. 1, 3, 8, 10, 22, and 24, March 1, 3, 8 and 10 (eight Mondays and eight Wednesdays; no class on Feb. 15 and 17), 4-5:20 p.m.
Grades 9-12: March 15, 17, 22, 24, 29 and 31, April 12, 14, 19, 21, 26 and 28, May 3, 5, 10 and 12 (eight Mondays and eight Wednesdays; no class on April 5 and 7), 4-5:20 p.m.

FUN WITH PHYSICS
(Grades 5-8) (575*)
Physics examines the universe around us, including what we experience physically and how we can explain those experiences mathematically. This class is designed to help students better describe the physical world through key physics principles. Students will explore forces, energy and motion using a PhET simulated laboratory, while gaining a deeper understanding of Next Generation Science Standards content.

Instructor: Veronica Galang has been an educator for more than 20 years, teaching astronomy, biology, chemistry, nanotechnology and physics. She has a master’s degree in physics and enjoys helping students apply critical and analytical thinking to understand the relationships between diverse concepts.

Class requirements: Tablet or computer with internet capability

Cost: $79
Dates and times: Choose Session 1 or 2
Session 1: Feb. 9, 16 and 23 (three Tuesdays), 6-8 p.m.
Session 2: April 13, 20 and 27 (three Tuesdays), 6-8 p.m.

GROWTH MINDSET AND THE POWER OF YET
(Grades 7-10) (495*)
Students in this course will learn how to be able to apply a “growth mindset” as they face challenges and frustrations in their personal and academic lives. Students will learn techniques to succeed in their personal and career goals, both current and future.

Instructor: Lisa Carrell began teaching “growth mindset” methods in 2006 and received the Silicon Valley Education Foundation’s prestigious “Teacher of the Year” award in 2017. She instructs students from ages 5 to 95 on using these methods to continuously strengthen their abilities and never give up.

Class requirements: Tablet or computer with internet capability

Cost: $215
Dates and times: Choose Session 1 or 2
Session 1: Jan. 9, 16 and 30, Feb. 6, 13 and 27, March 6 (eight Saturdays; no class on Feb. 20), 9:30-10:50 a.m.
Session 2: March 13, 20 and 27, April 3, 17 and 24, May 1 and 8 (eight Saturdays; no class on April 10), 9:30-10:50 a.m.

**HTML5 AND CSS3 – BEGINNING TO INTERMEDIATE (Grades 3-6) (557*)**

This class will explore the latest version of the programming language that powers the World Wide Web. Students will learn professional techniques for building responsive webpages, using the essential design and content tools of Hypertext Markup Language and Cascading Style Sheets.

**Instructor:** Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

**Class requirements:** Tablet or computer with internet capability

**Cost:** $215

**Dates and times:** March 14, 21 and 28, April 11, 18 and 25, May 2 and 9 (eight Sundays; no class on April 4), 2:30-3:50 p.m.

**HTML5 AND CSS3 – INTERMEDIATE TO ADVANCED (Grades 3-6) (558*)**

This class will dive further into the details of web design and web content, using the latest version of the programming language that powers the World Wide Web. Students will learn professional techniques for building responsive webpages, using the essential design and content tools of Hypertext Markup Language and Cascading Style Sheets.

**Instructor:** Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

**Class requirements:** Tablet or computer with internet capability

**Cost:** $215

**Dates and times:** Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 2:30-3:50 p.m.

---

**iOS MOBILE DEVELOPMENT – BEGINNING TO INTERMEDIATE (Ages 14 and up) (551*)**

This course will teach students how to build amazing iOS mobile apps, including functional prototypes that will be compatible with iPhones and iPads. Students will learn the basics of using Xcode and UI/UX design, while practicing with user interface elements and connecting those elements to code. Students will also be introduced to mobile app design patterns and current topics such as monitoring memory management. Finally, students will learn how to release apps through the Apple App Store.

**Instructor:** Guillermo Colin has a bachelor’s degree in software engineering from San José State University and has taught for Coding Dojo, De Anza College Academy, and other computer science tutoring programs. He loves coding and developing iOS mobile apps in his spare time, and sharing computer science knowledge with others.

**Class requirements:** Must be age 14 or older; must have an iOS or MacOS device.

**Cost:** $295

**Dates and times:** Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 4-5:20 p.m.

**Session 1:** March 16, 23 and 30, April 13, 20 and 27, May 4 and 11 (eight Tuesdays; no class on April 6), 4-5:20 p.m.

**Grades 9-12:** Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 10-11:20 a.m.

---

**JAVA PROGRAMMING – INTERMEDIATE TO ADVANCED (Grades 5-8 and 9-12) (464*)**

This class is for students who have basic Java programming skills and want to start building real-world applications. Java provides a vast set of tools that can be used for games and websites.

This class will include object-oriented programming and some of the advanced tools that are commonly used on Java development projects – including inheritance and abstraction, interfaces, nested classes, regular expressions, collections, dates and I/O.

**Class requirements:** Tablet or computer with internet capability and USB port

**Cost:** $215

**Dates and times:**
- **Grades 5-8:** Choose Session 1 or 2
  - **Session 1:** Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 4-5:20 p.m.
  - **Session 2:** March 16, 23 and 30, April 13, 20 and 27, May 4 and 11 (eight Tuesdays; no class on April 6), 4-5:20 p.m.
- **Grades 9-12:** Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 10-11:20 a.m.

**JAVA PROGRAMMING – BEGINNING TO INTERMEDIATE (Grades 5-8 and 9-12) (420*)**

This is an introduction to computer programming with the Java language, using object-oriented programming principles. Students will learn about Java primitive and non-primitive data types, control flow constructs, built-in class libraries, and object-oriented programming concepts such as classes, objects, method overloading and encapsulation. Typical assignments will cover built-in and programmer-defined classes, basic input and output operations, and solving programming problems.

**Instructor:** Eya Badal is a longtime software engineer who is currently pursuing an advanced software engineering degree. She has a knack for making difficult topics understandable.

**Dates and times:**

**Grades 5-8:** March 17, 24 and 31, April 14, 21 and 28, May 5 and 12 (eight Wednesdays; no class on April 7), 4-5:20 p.m.

**Grades 9-12:** Choose Session 1 or 2

**Session 1:** Jan. 12, 19 and 26, Feb. 2, 9 and 23, March 2 and 9 (eight Tuesdays; no class on Feb. 16), 4-5:20 p.m.

**Session 2:** March 19 and 26, April 2, 16, 23 and 30, May 7 and 14 (eight Fridays; no class on April 9), 4-5:20 p.m.

**Instructor:** Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

**Class requirements:** Tablet or computer with internet capability and USB port

**Cost:** $215

**Dates and times:** Choose Session 1 or 2

**Session 1:** Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 12:30-1:50 p.m.

**Session 2:** March 14, 21 and 28, April 11, 18 and 25 (six Sundays; no class on April 4), 4:30-5:30 p.m.

**L.E.A.N. START ONLINE**

**NUTRITION FOR KIDS**

*(Grades 3-6 and 7-12) (578)*

L.E.A.N Start Online is a research-based, interactive and kid-friendly program that can help your family make healthy food and lifestyle choices. This course will cover ways to feed the immune system with the right carbs, fats and proteins, and how food choices can relate to long-term performance goals and abilities. Students will learn about “Grow” foods, “Run Fast” foods, “Fill Up” foods and “Keep You From Getting Sick” foods. This course can help young students become healthy grazers and “Nutrition Detectives,” while teaching them about food labels and marketing.

**Instructor:** Ankita Kaul has a Master Health Coach Certification from the Dr. Sears Wellness Institute and is co-founder of Happy2bHealthy (H2BH), a program for promoting health and wellness awareness for adults and children. H2BH specializes in providing health education and useful everyday tips through workshops for families and children, as well as for adults in their prime.

**Class requirements:** Tablet or computer with internet capability

**Cost:** $109

**Dates and times:**

**Grades 3-6:** March 14, 21 and 28, April 11, 18 and 25 (six Sundays; no class on April 4), 3-4 p.m.

**Grades 7-12:** March 14, 21 and 28, April 11, 18 and 25 (six Sundays; no class on April 4), 4:30-5:30 p.m.

**LITERARY ANALYSIS**

*(Grades 6-8 and 9-12) (567)*

This class will build critical-thinking as students analyze several short stories and poems, answering written questions designed to test comprehension and reasoning. The course will begin with a review of basic literary elements, and end with a guided book report assignment on a grade-appropriate work of fiction selected by the student. Students will be required to read the book independently over the eight weeks of the course. While all written assignments will be completed during class hours, students may need to read the short stories on their own before coming to class.

**Instructor:** Bina Barnabas grew up in India, where she earned a bachelor’s degree in education and a master’s in English literature. For more than 40 years, she has taught students ranging in age from 5 to 75 in India, Japan and the United States. She especially enjoys teaching language arts to middle schoolers. She likes to read and play with paper, fabric, needle and thread.

**Class requirements:** Tablet or computer with internet capability

**Cost:** $215

**Dates and times:**

**Grades 6-8:** Choose Session 1 or 2

**Session 1:** Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 9:30-10:50 a.m.

**Session 2:** March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 9:30-10:50 a.m.

**Grades 9-12:** Choose Session 1 or 2

**Session 1:** Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 11 a.m.-12:20 p.m.

**Session 2:** March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 11 a.m.-12:20 p.m.
MACHINE LEARNING TO DEEP LEARNING – BEGINNING TO INTERMEDIATE (Grades 9-12) (580*)
This course provides a broad introduction to machine learning, data mining, and statistical pattern recognition, as well as how to build deep learning networks. Students will gain foundational knowledge of machine learning algorithms and gain practical experience in building neural networks in TensorFlow and Keras in Google Colaboratory. They will also learn about convolutional networks, SGD, Adam, Dropout, BatchNorm and more.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 12:30-1:50 p.m.

MACHINE LEARNING TO DEEP LEARNING – INTERMEDIATE TO ADVANCED (Grades 9-12) (581*)
Students in this course will continue their exploration of machine learning, data mining, and statistical pattern recognition, as well as how to build deep learning networks. Building on their basic knowledge of machine learning concepts, students will learn more about deep neural networks and gain practical experience in building with TensorFlow and Keras in Google Colaboratory. Participants will also review some research papers and critique.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 4-5:20 p.m.

OBJECT ORIENTED PROGRAMMING USING C++ – BEGINNING TO INTERMEDIATE (Grades 8-12) (583*)
This course will help students become familiar with universal concepts of computer programming while learning the syntax, semantics, and basic data types of the C++ language. Students will learn to develop and implement efficient programs in C++. The instructor will discuss principles of the object-oriented model and its implementation in the C++ language, and demonstrate the means to resolve typical implementation problems with the help of standard C++ language libraries.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 12:30-1:50 p.m.

OBJECT ORIENTED PROGRAMMING USING C++ – INTERMEDIATE TO ADVANCED (Grades 8-12) (584*)
Students in this course will continue their exploration of universal concepts of computer programming, while learning more about the syntax, semantics, and basic data types of the C++ language. The instructor will discuss principles of the object-oriented model and its implementation in the C++ language, and demonstrate the means to resolve typical implementation problems with the help of standard C++ language libraries. Students will also be introduced to more advanced topics such as file operations, memory management, exception handling and more.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 4-5:20 p.m.

PHYSICS IN ACTION  
(Grades 9-12) (585*)
This class is designed to foster creativity while exploring physics. Students will learn fundamental principles that are foundational to high school physics, in a framework that promotes critical thinking, open-ended discussion and solution-oriented investigation. This highly interactive, hands-on class is perfect for students who are curious about how and why things work.

Instructor: Veronica Galang has been an educator for more than 20 years, teaching astronomy, biology, chemistry, nanotechnology and physics. She has a master's degree in physics and enjoys helping students apply critical and analytical thinking to understand the relationships between diverse concepts.

Class requirements: Tablet or computer with internet capability

Cost: $215

Dates and times: Choose Session 1 or 2
Session 1: Jan. 9, 16, 23 and 30, Feb. 6, 13 and 27; March 6 (eight Saturdays; no class on Feb. 20), 11 a.m.-12:20 p.m.
Session 2: March 13, 20 and 27, April 3, 17 and 24, May 1 and 8 (eight Saturdays; no class on April 10), 11 a.m.-12:20 p.m.

PSAT WRITING AND LANGUAGE PREPARATION  
(Grades 7-9) (542*)
This course will help students develop a personalized plan for PSAT preparation, and provide extensive practice opportunities for the Reading, Writing and Language sections of the PSAT. Students will follow a plan for vocabulary enhancement and use class time to focus on skills development – including evidence-based interpretations, applying context in analysis, and using organization and structure for sentences, passages and essays.

Instructor: Bina Barnabas grew up in India, where she earned a bachelor’s degree in education and a master’s in English literature. For more than 40 years, she has taught ranging in age from 5 to 75 in India, Japan and the United States. She especially enjoys teaching language arts to middle schoolers. She likes to read and play with paper, fabric, needle and thread.

Cost: $295

Dates and times: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 2-3:50 p.m.

PSAT MATH PREPARATION  
(Grades 7-9) (541*)
This course will help students develop a personalized plan for PSAT preparation, while providing extensive practice opportunities for the Mathematics sections of the PSAT. Students will study essential facets of arithmetic, algebra, geometry, data analysis and logic that directly relate to PSAT and SAT performance, including linear equations and systems in algebraic expressions, data analysis and quantitative literacy, and fluency with complex equations.

Instructor: Ahmad Khanssari has a bachelor’s degree in electrical engineering from San José State University and worked as a system design engineer in the electronics industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Class requirements: Tablet or computer with internet capability

Cost: $215

Dates and times: Choose Session 1 or 2
Session 1: Jan. 15, 22 and 29, Feb. 5, 12 and 26, March 5 and 12 (eight Fridays; no class on Feb. 19), 4-5:20 p.m.
Session 2: March 19 and 26, April 2, 16, 23 and 30, May 7 and 14 (eight Fridays; no class on April 9), 4-5:20 p.m.

PYTHON PROGRAMMING – BEGINNING  
(Grades 1-4) (467*)
The course will introduce students to the Python programming language in a simple, fun and easy way, using Python graphics. Students will learn the fundamentals of the Python language and then implement those fundamentals by drawing various shapes and creating greeting cards.

Instructor: Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Class requirements: Tablet or computer with internet capability

Cost: $215

Dates and times: Choose Session 1 or 2
Session 1: Jan. 15, 22 and 29, Feb. 5, 12 and 26, March 5 and 12 (eight Fridays; no class on Feb. 19), 4-5:20 p.m.
Session 2: March 19 and 26, April 2, 16, 23 and 30, May 7 and 14 (eight Fridays; no class on April 9), 4-5:20 p.m.
DE ANZA COLLEGE

Making difficult topics understandable.

Instructor:

Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Dates and times:

Grades 3-6: March 19 and 26, April 2, 16, 23 and 30, May 7 and 14 (eight Fridays; no class on April 9), 4-5:20 p.m.

Instructor:

Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Dates and times:

Grades 5-8: Choose Session 1 or 2

Session 1: Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 5:30-6:50 p.m.

Session 2: March 17, 24 and 31, April 14, 21 and 28, May 5 and 12 (eight Wednesdays; no class on April 7), 5:30-6:50 p.m.

Grades 9-12: Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 10:30-11:50 a.m.

PYTHON PROGRAMMING – BEGINNING TO INTERMEDIATE

(Grades 3-6, 5-8 and 9-12) (467*)

This course introduces students to basic elements of the Python programming language, including data types, control structures, algorithm development and program design with functions. Students will learn to define new object classes, create interactive applications with buttons, learn about animation and create an interactive game using Python. The instructor will also cover fundamental principles of object-oriented programming, as well as data and information processing techniques.

Class requirements: Tablet or computer with internet capability

Cost: $215

Instructor:

Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Dates and times:

Grades 5-8: Choose Session 1 or 2

Session 1: Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 5:30-6:50 p.m.

Session 2: March 17, 24 and 31, April 14, 21 and 28, May 5 and 12 (eight Wednesdays; no class on April 7), 5:30-6:50 p.m.

Grades 9-12: Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 10:30-11:50 a.m.

PYTHON PROGRAMMING – INTERMEDIATE TO ADVANCED

(Grades 3-6, 5-8 and 9-12) (419*)

This course will help students strengthen their skills and build on what they have learned in previous introductory classes. Through practical examples, students will gain a deeper understanding of programming and how it is applied in the real world. Projects will reinforce their understanding of fundamentals while encouraging experimentation and exploration. Students will learn about building a platform and applications using Python installation, variables, operators, strings, lists, tuples and maps, Turtle, drawing, conditional statements, loops, functions, objects and classes.

Class requirements: Tablet or computer with internet capability

Cost: $215

Instructor:

Eva Badal is a longtime software engineer who is currently pursuing an advanced software engineering degree. She has a knack for making difficult topics understandable.

Dates and times:

Grades 5-8: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 10-11:20 a.m.

Grades 9-12: Jan. 15, 22 and 29, Feb. 5, 12 and 26, March 5 and 12 (eight Fridays; no class on Feb. 19), 4-5:20 p.m.

Instructor:

Eva Badal is a longtime software engineer who is currently pursuing an advanced software engineering degree. She has a knack for making difficult topics understandable.

Dates and times:

Grades 5-8: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 10-11:20 a.m.

Grades 9-12: Jan. 15, 22 and 29, Feb. 5, 12 and 26, March 5 and 12 (eight Fridays; no class on Feb. 19), 4-5:20 p.m.

Instructor:

Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Dates and times:

Grades 5-8: Choose Session 1 or 2

Session 1: Jan. 13, 20 and 27, Feb. 3, 10 and 24, March 3 and 10 (eight Wednesdays; no class on Feb. 17), 5:30-6:50 p.m.

Session 2: March 17, 24 and 31, April 14, 21 and 28, May 5 and 12 (eight Wednesdays; no class on April 7), 5:30-6:50 p.m.

Grades 9-12: Jan. 10, 17, 24 and 31, Feb. 7, 21 and 28, March 7 (eight Sundays; no class on Feb. 14), 10:30-11:50 a.m.

RASPBERRY PI USING PYTHON PROGRAMMING – BEGINNING TO INTERMEDIATE

(Grades 5-8 and 9-12) (547*)

Students will explore features of the Raspberry Pi computing device while using Python, one of the most popular and widely used programming languages in the world. The course will focus on the fundamentals of circuit building, using electrical components such as LEDs, switches, buzzers, sensors, motors and more. Students will be guided through the software and hardware elements of the Raspberry Pi unit as they install operating systems, prepare software for connecting electronic hardware, and implement a functioning circuit. They will also solve hands-on programming exercises and complete practical real-world projects.

Instructor:

Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Class requirements: Tablet or computer with internet capability, keyboard, mouse and monitor; Raspberry Pi 4 Starter Kit (1 GB, 2 GB, or 4 GB of RAM); electrical components for Raspberry Pi 4 including the SunFounder Raspberry Pi 4 Model B Starter Kit. (The Raspberry Pi hardware can be purchased for about $130.)

Cost: $215

Dates and times:

Grades 5-8: March 15, 22 and 29, April 12, 19 and 26, May 3 and 10 (eight Mondays; no class on April 5), 4-5:20 p.m.

Grades 9-12: Jan. 11, 18 and 25, Feb. 1, 8 and 22, March 1 and 8 (eight Mondays; no class on Feb. 15), 4-5:20 p.m.

*Use the class number (after each course title) when registering online.

Register now at deanza.augusoft.net
SAT MATHEMATICS  
(Grades 9-12) (473*)
This course will help students prepare for the math section of the SAT, including changes that have been made since the introduction of Common Core State Standards. The instructor will address different types of math questions on the test, while also teaching general skills for success and focusing on each student's broader purpose and goals. The class will also cover concepts that can be applied to other math classes and everyday life.

Cost: $395

Instructor: Ahmad Khanassi has a bachelor's degree in electrical engineering from San José State University and worked as a system design engineer in the electronics industry. He subsequently earned an MBA and a master's degree in education from the University of Southern California. He has taught mathematics for six years.

Dates and times: Choose Session 1 or 2
Session 1 (Preparation for the SAT given March 13): Jan. 9, 16, 23 and 30, Feb. 6, 13 and 27, March 6 (eight Saturdays; no class on Feb. 20), 9-11:50 a.m.
Session 2 (Preparation for the SAT given May 8): April 3, 13, 20 and 27, April 3, 17 and 24, May 1 (eight Saturdays; no class on April 10), noon-2:50 p.m.

SAT WRITING AND LANGUAGE, READING AND ESSAY  
(Grades 9-12) (474*)
This course will help each student prepare an individualized plan for SAT preparation, while providing extensive opportunities to practice for the Writing and Language, Reading and Essay sections of the test. Students will learn and practice strategies for all types of questions they may encounter. The class also covers planning for vocabulary enhancement and provides class time for skills development, including evidence-based interpretation, applying context in analysis, and understanding organization and structure for sentences, passages and essays.

Instructor: Jonathan Stiles has a master's degree in teaching from Bethany University and has earned two teaching credentials. He has taught students in grades 4-12 for more than a decade.

Cost: $395

Dates and times: Choose Session 1, 2 or 3
Session 1 (Preparation for the SAT given March 13): Jan. 9, 16, 23 and 30, Feb. 6, 13 and 27, March 6 (eight Saturdays; no class on Feb. 20), 9-11:50 a.m.
Session 2 (Preparation for the SAT given May 8): April 3, 13, 20 and 27, April 3, 17 and 24, May 1 (eight Saturdays; no class on April 10), noon-2:50 p.m.
Session 3 (Preparation for the SAT given June 5): April 3, 17 and 24, May 1, 8, 15, 22 and 29 (eight Saturdays; no class on April 10), 9-11:50 a.m.

SCRATCH PROGRAMMING – BEGINNING  
(Grades 1-4) (385*)
This course will introduce students to programming in a fun way, through block coding. The instructor will walk students through the steps of programming a game, explaining key concepts as they arise. Students will begin by sketching out what the final game will look like, before planning and coding the main parts of the program. This course provides a hands-on, problem-solving approach to learning programming and related concepts in computer science, while encouraging students to use their imaginations in creating a game.

Instructor: Pragati Dharmale has taught for more than 12 years in schools and industry, including courses in engineering and programming languages. She has also worked as a senior design engineer for Whirlpool in India, a web and software developer for Resource Navigation in Boston, and a data security processor for Intuit in Tucson.

Class requirements: Tablet or computer with internet capability

Cost: $215

Dates and times: Choose Session 1 or 2
Session 1: Jan. 16, 23 and 30, Feb. 6, 13 and 27, March 6 and 13 (eight Saturdays; no class on Feb. 20), 10:30-11:50 a.m.
Session 2: March 20 and 27, April 3, 17 and 24, May 1, 8 and 15 (eight Saturdays; no class on April 10), 10:30-11:50 a.m.
WEB DEVELOPMENT – BEGINNING TO INTERMEDIATE
(Grades 8-12) (398*)
This course is designed to start students on a path toward future studies in web development and design— even if they have little experience or technical knowledge. Students will spend time designing, building and publishing their own websites, as they begin to learn the big three web languages: HTML, CSS and JavaScript. The class will also introduce students to the basics of how the internet works and important concepts of internet safety.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times: March 14, 21 and 28, April 11, 18 and 25, May 2 and 9 (eight Sundays; no class on April 4), 4-5:20 p.m.

WEB DEVELOPMENT – INTERMEDIATE TO ADVANCED
(Grades 8-12) (588*)
Students in this course will continue their study of web development and design, as they practice designing with mobile first concepts, while building and publishing their own responsive websites. Students will also learn how to automatically test their websites for compatibility between various browsers as well devices.

Instructor: Jasneet Matta has a master’s degree in information technology from Mumbai University and has taught students in grade school through college. She thrives on teaching students to grow socially and academically, while helping them gain self-confidence through motivation and encouragement.

Class requirements: Tablet or computer with internet capability
Cost: $215
Dates and times:
Grades 6-8: Jan. 17, 24 and 31, Feb. 7, 21 and 28, March 7 and 14 (eight Sundays; no class on Feb. 14), 9:30-10:50 a.m.
Grades 9-12: Jan. 17, 24 and 31, Feb. 7, 21 and 28, March 7 and 14 (eight Sundays; no class on Feb. 14), 12:30-1:50 p.m.

Winter and spring Community Education
classes will meet online only.

ONLINE CLASS
INFORMATION
Winter and spring Community Education
classes will be held online via Zoom,
unless otherwise noted. We will email
students with information on how to
access each class before the first
session. For assistance, please email
communityeducation@deanza.edu

EASY WAYS TO ENROLL
All new students must create a student
profile in the registration system before
enrolling in a class. If you forget your
username or password, you can retrieve it
by clicking the “Forgot My Password” link
on the sign-in page.

ONLINE: Register online 24/7 with a valid
Visa, MasterCard or Discover card. Visit
deanza.edu/communityed for information
and instructions. If you need technical
assistance, please call 408.864.8817
during office hours.

IN PERSON: In-person registration is not
currently available. Please register online
or call us at 408.864.8817 during office
hours should you need assistance.

CLASS CONFIRMATION &
TRANSACTION RECEIPTS
Once you create your student profile
and enroll in a course, you will receive
confirmation and a receipt via email. You
can also view the transaction receipt
and class confirmation on our online
registration system.

MATERIALS & BOOKS
Some classes may require additional
materials and or books. Unless otherwise
noted, students are responsible for
acquiring all materials and or books
required for the class.

CAMPUS SECURITY
WEEKDAYS: 408.864.5555
WEEKENDS AND EMERGENCIES:

CANCELED CLASSES
De Anza College Community Education
reserves the right to change or combine
courses, programs, presenters and
locations. If we cancel a class, you will
be notified no later than one business
day prior to the start date via telephone
or email. A full refund will be issued to
your credit card within two weeks of the
cancellation.

DROP & REFUND POLICY
If you need to withdraw from a class,
you must submit an email request to
the Community Education office at
least five business days prior to the first
class. Holidays and weekends are not
considered business days. No phone
requests for refunds will be accepted.
A $15 processing fee per class will be
deducted. Credit card refunds may take
up to 30 working days to process. Please
email communityeducation@deanza.edu
to request a refund.

ELECTRONIC VOUCHERS: If you choose
to receive an electronic voucher in lieu
of refund, the $15 processing fee will
be waived. Vouchers are good for one
calendar year from the date of issue.

There are no refunds after the electronic
voucher has been processed.

ABSENCES AND FEES: Refunds are not
issued for absences nor prorated for late
registration. Missed class meetings may
not be made up in another class. In order

to observe student privacy, online class
sessions will not be recorded.
