Instructor: Dr. Zack Judson
Office Hours: MWF 9:30-10:20
judsonzack@deanza.edu
(Note: I will not answer Math questions over email)
Prerequisite: $\quad$ Math 212 or an equivalent course
Text:

1) INTERMEDIATE ALGEBRA, $7^{\text {th }}$ Edition BY BLITZER
2) Student Access Code to MyMathLab (Required)
3) A Scientific Calculator (i.e. TI-30XIIS)

Midterm Exams: Four exams will be given with no make-ups. If an exam is missed under extreme circumstances and for a very valid reason, something will be arranged.

Homework: Homework will be assigned on MyMathLab. No late work will be accepted. MyMathLab

Course ID: judson34806
Groupwork: Students will often work in groups. Often this work will be at the board. This work will largely be graded based on effort. There will be no make-up group work allowed. If you are going to miss class for any reason you must inform me by email. Be sure that your email contains the date of the absence and your reason for missing class. Emails should be sent prior to the date missed. Due to some circumstances this may not be possible and the email must then be sent at the earliest opportunity.

Final Exam: On the last Tuesday of class there will be an exam covering all of the applications covered during this course. This score will be combined with the two-hour comprehensive exam that will be given during the final exam time.

Accommodations: Those of you who need additional accommodations due to disability, campus related activities, or some other reason, please meet with me during the first two weeks of class to discuss your options.

Grade: The way in which the homework, groupwork, quizzes, midterms and finals will contribute to your grade will be co-constructed by the class on the first day of the quarter.

Grading Scale: $\quad$ A : 93-100 $\quad \mathrm{B}+: 87-89 \quad \mathrm{C}+: 77-79 \quad$ D : 60-69 $\quad$ F : 0-59
A-: 90-92 B : 83-86 C : 70-76
B- : 80-82

Tentative Schedule
Math 114 Spring Quarter 2019

|  | Monday | Tuesday | Wednesday | Thursday | Friday |
| :---: | :---: | :---: | :---: | :---: | :---: |
| April | Introductions 8 | Review of Exponents 9 | Basics of Factoring 10 | $\begin{aligned} & \text { Mixed Factoring } \\ & 11 \end{aligned}$ | Mixed Review $12$ |
| April | Rational Functions 15 | Simplifying Rationals 16 | Common Denominators 17 | Adding Rationals $18$ | Rational Equations 19 |
| April | Rational Models $22$ | Rational Models $23$ | Review 24 | $\begin{aligned} & \text { Midterm 1 } \\ & 25 \\ & \hline \end{aligned}$ | Absolute Value Equations $26$ |
| April/May | Absolute Value Inequalities $29$ | Radicals and Roots $30$ | Rational Exponents 1 | Simplifying <br> Radicals <br> 2 | Arithmetic with Radicals $3$ |
| May | Radical Equations 6 | Radical Models 7 | Circles and the Distance formula 8 | Review 9 | Midterm 2 $10$ |
| May | Graphing Exponentials 13 | Exponential Functions 14 | Exponential Models 15 | Exponential Growth and 16 Decay | Inverse <br> Functions <br> 17 |
| May | Logarithmic Functions $20$ | Translating Logarithms 21 | Expanding Logarithms 22 | Condensing Logarithms 23 | Logarithmic Review $24$ |
| May | Memorial Day $27$ | Logarithmic <br> Equations <br> 28 | Exponential Equations 29 | Exponential <br> Models Revisited <br> 30 | Growth and Decay Revisited 31 |
| June | Review 3 | Midterm 3 $5$ | Introduction to Sequences 6 | Introduction to Series 7 | Arithmetic Sequences 8 |
| June | Arithmetic Series $10$ | Geometric Sequences 11 | Geometric Series $12$ | Review $13$ | Midterm 4 $14$ |
| June | Review of Applications I 17 | Review of Applications I 19 | Application Final $20$ | Review for Final $\begin{array}{\|l\|} \hline 21 \\ \hline \end{array}$ | Exit Survey $22$ |
| June | $\begin{array}{\|l\|} \hline \text { Final } \\ 7: 00-9: 00 \mathrm{am} \\ 24 \\ \hline \end{array}$ | 26 | 27 | 28 | 29 |

Important Dates: April 20: Last day to add a class
April 21: Last day to drop with no grade on record.
May 3: Last day to request Pass/No Pass grade.
May 31: Last day to drop with a "W".

## Student Learning Outcome(s):

*Evaluate real-world situations and distinguish between and apply exponential, logarithmic, rational, and discrete function models appropriately.
*Analyze, interpret, and communicate results of exponential, logarithmic, rational, and discrete models in a logical manner from four points of view - visual, formula, numerical, and written.
